“Senderos de Pequeño Recorrido” (PRs) and “Senderos de Gran Recorrido” (GRs). These are traditional trails signposted in colours to facilitate orientation. They can be used by anyone in good physical shape and moderately accustomed to walking in the mountains.

Please remember that keeping this landscape beautiful is everyone’s responsibility. Do not light fires or leave rubbish behind, take it with you until you can leave it in the appropriate place. Respect crops and rural constructions, and plant and animal life in general.

Publications and maps
Visitors interested in excursions can consult two works by R. Cebrián: *Montañas Valencianas* vol. II (Valencia, 1983) and *Montañas Valencianas* vol. III (Valencia, Centre Excursionista de València, 1986). In view of its publication date, some itineraries may have changed due to the growth of vegetation or destruction of the natural habitat by forest fires. Before going on an excursion or doing outdoor sports in the district it is recommendable to consult maps and obtain detailed written information. The Buñol Valley is included in the following 1:50,000 scale maps: Chulilla 27-27 (694), Llíria 28-27 (695), Requena 27-28 (720), Cheste 28-28 (721), Jalance 27-29 (745) and Llombai 28-29 (746).
everyone, a quiet rest next to the cool waters of the Turche waterfall or at any of
Sierra Malacara, or wandering through the Vallesa valley and
